CAREER OBJECTIVE

Motivated Computer Science undergraduate with proficiency in Python and core CS concepts including Data Structures, Operating Systems, and Networking. Eager to apply skills in real-world projects and collaborative environments.

SKILLS

- **Programming Languages:** C | C++|Python
- **Technical Skills:** Data Structures | Algorithms | OOPS | Operating Systems | Computer Networks | Cloud Computing
- **Tools:** Git & GitHub | MySQL | Kaggle
- **Soft Skills:** Adaptability | Team Collaboration | Quick Learner | Integrity
- **Languages Spoken:** English | Kannada| German

EDUCATION

• Vidyavardhaka College of Engineering, Mysuru – **B.E. (CSE)**	CGPA: 8.25	2023 – Present
• Sadvidya Composite Pre-University, Mysuru – **XII**	Percentage: 91%	2021– 2023
• Sadvidya High School – **X**	Percentage: 82%	2020– 2021

PROJECTS

Dysgraphia Detection using CNN

- Designed and implemented a Convolutional Neural Network (CNN) model to classify dysgraphia from handwritten text images.
- Performed image preprocessing techniques including resizing, normalization, and feature extraction to enhance model performance.
- Trained and validated the model on labeled handwriting datasets to ensure robust and reliable predictions.
- Optimized model parameters to improve classification accuracy and generalization.
- Secured 3rd Place at PES University Apex Club Hackathon.

AI-Powered Cloud Cost Anomaly Detection System

- Developed an intelligent cloud cost monitoring system to detect anomalous billing spikes using machine learning–based analysis of historical usage data.
- Designed a risk classification framework categorizing cloud expenses into low, medium, and high severity levels for proactive budget control.
- Built interactive dashboards and visual analytics to identify cost trends and support data-driven cloud optimization decisions.
- Implemented predictive models to forecast future cloud expenditure based on historical billing patterns.
- Created a simulation module to evaluate cost-optimization strategies and enable proactive infrastructure planning.
- Improved visibility into resource utilization patterns to help reduce unexpected cloud spending and enhance operational efficiency.

LEADERSHIP & IMPACT

- Attended GDSC GEN AI workshop
- Advance Cybersecurity and Linux workshop by SRC,VVCE
- Took part in PRAYOG Hackathon,VVCE
- Participated in Google Cloud Hackathon,VVCE

CERTIFICATES

- Introduction to Web Development and Devops –Issued by IBM
- Operating Systems Fundamentals – Issued by Akamai
- Python Data Analytics – Issued by Meta
- Ethical Hacking Fundamentals – Issued by LearnKartS
